**Scott Stark** - Red Hat - Scott Marlow Enterprise Member

**Zhai Luchao** - Shandong Cvicse Middleware Co. - Enterprise Member

Guests - Jakarta EE 11 co-release coordinators: Ed Burns, Arjan Tijms

Eclipse Foundation: **Tanja Obradovic**, Wayne Beaton, **Paul Buck** (chair)

Past business / action items:

- Approval is requested for the minutes from the September 20th, 2023 meeting as drafted - Approved.

## Agenda:

- Ongoing tracking [spreadsheet](#) of specifications progressing through the [JESP](#) version [lifecycle](#)

See the spreadsheet for updates.

Notes from 09/05 call:

1. Scott to notify the EMO to provide guidance on question of is a new ballot required for the proposed refactoring of the CDI specification to break out the integration elements
2. Question/discussion with regards to where “integration” specifications should live? Web Profile? What about the related TCK artifacts (which when passed bind IP)? Scott to follow up on this one.
  - Proposal is to proceed to an EMO request for restructuring review
  - Platform Project to consider how best to handle similar specification refactoring in the future

[10/04] Check in on where this one is at

Scott to follow-up with the EMO regarding a restructuring review.

- The [Jakarta EE Versioning, Change, and Deprecation Process](#) was finalized and ballot concluded successfully [See <https://www.eclipse.org/lists/jakarta.ee-spec.committee/msg03417.html>]

- Next steps:
  - Refer process to the Steering Committee for ratification
  - Update the website with the new document

Need to determine where best to link this revised process which is wider in scope, suggestion is to put it on <https://jakarta.ee/committees/specification/>, also then send an email to the Spec Discussions mailing list.

[10/04] The Steering Committee has been informed, the document can be posted to <https://jakarta.ee/committees/specification/>, is there a volunteer? Andrew to create a PR and Eclipse WebDev can approve

[\[https://github.com/jakartaee/jakarta.ee/tree/src/content/committees/specification\]](https://github.com/jakartaee/jakarta.ee/tree/src/content/committees/specification)

Ideas to communicate:

Send an email to the public spec discussion mailing list to let spec leaders know Q&A or FAQ to accompany the process

A presentation at JakartaOne Livestream in December? Audience of the document is mainly the spec projects. Could be a good one to add to an existing talk or segment? Explain implications to application developers.
